

TRASTAMO's quality policy focus mainly on the fulfillment of the commitments acquired with our clients, guaranteeing that our products have been obtained taking all necessary actions to ensure the accomplishment of the pre-established requirements.

With this aim, TRASTAMO compromises to provide human, technical, organizational resources to be able to:

- Work rigorously, systematizing work method and applying only previously revised or approved procedures.
- Corroborate that measure and testing instrumental is adequate for the intended purpose and that this adequacy maintains while the equipment is running on.
- Guarantee that manufacturing processes are carried out under controlled conditions and according to the process specification and the applicable procedures and instruction in each case.
- Guarantee that procedures used are previously revised and approved and that they cover all aspects related to the measure and testing process.
- To achieve greater prevention of incidents.
- Guarantee Safety and risk prevention with the necessary actions to avoid accidents and ensure health of the collaborators and the environment.
- Promote work and command styles that motivate and systematize open participation of all TRASTAMO's workers, fomenting teamwork.
- Collaborate closely with clients in order to achieve mutual benefits and to satisfy their needs.
- Minimize waste and manage it through authorized managers.
